

Mixed native text and image text

Before OCR: the paragraph below is selectable; the shaded image is not.

After OCR: both image lines become searchable and selectable.

The native paragraph must remain present exactly once.

RASTER ALPHA ONE

RASTER BETA TWO

Native paragraph: keep this original text.

Image with a partial existing text layer

The first image line already has invisible, selectable text.

The second image line has no text layer and needs OCR.

After OCR: each line should occur once when copied or searched.

COVERED FIRST LINE

UNCOVERED SECOND LINE

Image with a complete existing text layer

Both image lines already have invisible, selectable text.

OCR should add no duplicate text to this image.

Copy the image text: each line should appear exactly once.

PRESERVED GAMMA THREE

PRESERVED DELTA FOUR

Native text only

This page contains no images, so OCR has nothing to add.

Its text must remain searchable and selectable before and after OCR.

Native-only control: ECHO FIVE.

Keep every original character intact.
