

PDF layer test fixture

Open with the official Poppler backend, then open the Layers sidebar.

Eight layers: default visibility, nesting, radio choices, and a locked layer.

1. Red - initially ON

RED IS VISIBLE

2. Blue - initially OFF

Blue layer is hidden

3. Nested parent - initially ON

CHILD A

Nested-layer checks

Child A starts ON; Child B starts OFF.

Turn the parent OFF: both disappear.

Child marks require parent AND child ON.

4. Exclusive choice - A initially ON

VARIANT A

Radio-group checks

Select Variant B: Variant A turns OFF.

Select Variant A: Variant B turns OFF.

Both may be OFF; both must not be ON.

5. Locked layer - initially ON

LOCKED IS VISIBLE

Locked-layer checks

The locked layer should stay visible.

Its visibility control should be disabled.

All gray cards and instructions are static.

Default: red, parent frame, Child A, Variant A, and locked patch visible.

Default: blue, Child B, and Variant B hidden. Toggle each and check immediate redraw.

Reopen without saving to check defaults. This fixture contains no JavaScript.
