

Overprint simulation test

Toggle General > Rendering Quality > Simulate overprinting in Okular.

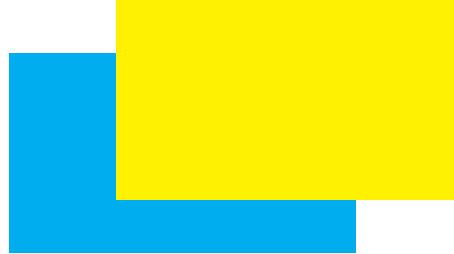

Compare the overlap in the left samples with the knockout controls on the right.

OVERPRINT
Process CMYK - OPM 1

ON: green overlap. OFF: yellow overlap.

KNOCKOUT CONTROL
Process CMYK - OPM 1

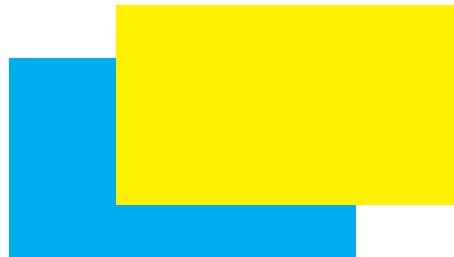

Always: yellow overlap.

Process CMYK - OPM 0

ON and OFF: yellow overlap.

Process CMYK - OPM 0

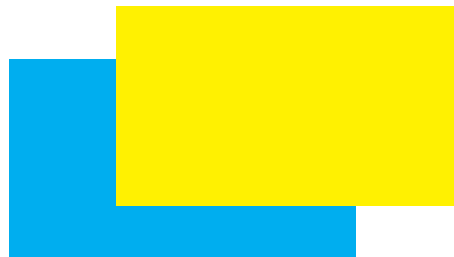

Always: yellow overlap.

Spot yellow - Separation color

ON: green overlap. OFF: yellow overlap.

Spot yellow - Separation color

Always: yellow overlap.

OPM 1 preserves zero CMYK components; OPM 0 paints all process components.

Each sample paints yellow over cyan. No transparency or blend modes are used.

Preview only: the printer handles the original PDF overprint instructions.
